The treasury department has granted the application of M. N. Wisdem, secretary of the North, Central and South American exposition at New Orleans, for permission to withdraw and export, independently from the original import packings, paintings of various foreign artists which were imported for the exhibition. This action was based on information that the exposition is bankrupt, and therefore unable to restore the paintings loaned it by various foreign artists. Some of the artists have ordered their works to be returned to them at their own expense and the breaking up of the packings, as originally imported, is necessary.

GEN. MILES' REPORT. General Miles' annual report, as commander of the military department of Ari-zona and New Mexico, which has been received at the war department, is a volumin-ous document containing a full history of band, together with a statement of its po-sition in regard to terms of surrender. It is learned that this part of his report sets forth minutely the official orders received by him, his orders placing Capt. Lawton in command, the system of signaling adopted, etc., and afterwards receipts to substantiate the following details.

General Miles in his report, argues at some length the question of punishment, and calls attention to the fact that in such cases that removals has been deemed sufficient. He cites several cases in which no greater punishment has been inflicted, speaks of the great good done to Arizona by their removal, and suggests that they be treated as other Indians have been treated under similar circumstances. He highly compliments Captain Lawton, Licutenant Gatewood and the officers and soldiers generally, for their meriterous services during the campaign.

October Report of Cereal Crops,
Washington, D. C., Oct. 11.—The report of the department of agriculture for October gives local estimates of the yield per acre of small grain, with the condition of corn, potatoes and other late crops. The results corroborate previous returns of wheat, confining expectations of a slight increase from the first records of that crop without making any very material additions to the crop aggregate. The average yield upon the area is fully 37,000,000 acres, appears to be close to twelve and one-half bushels per acre, making the crop of an average for a series of lifteen years. The area actually harvested is now the principal object of exact determination. Results will vary little from an increase of 100,000 bushels on the crops of last year. St. John, N. F., Oct. 11.—The steamer Anchoria. Capt. Small in charge, left Glasgow Sept. 18th bound for New York. She had 700 souls on board including passengers and crew.
